

About Us

Contoro is an Austin, TX based robotics company focused on warehouse automation

.....

The team at Contoro has developed and commercially deployed robots that specialize in unloading multi-SKU boxes from floor-loaded or non-palletized shipping containers and trailers.

.....

Contoro's reliable and safe unloading service saves customers money from day one with no upfront costs – customers only pay per container

Why Contoro

- ✓ No capex model- pay per container unloaded and positive ROI from day 1
- ✓ Stable, reliable, and safer alternative to human labor
- ✓ No system integration required with fully operational in less than a day
- ✓ Unique gripper allows unloading large and heavy cases (up to 80 lbs when top surface is available)

Key Highlights -

Industrial Arm

Reliable + commercially available industrial-grade robotic arm to allow for rapid scaling and manufacturability

DuoGrasp

Patented articulated gripper allows for two-sided box grasp for added stability to unload heavy, multi-dimensional boxes without box damage

AdaptAI + IntelOp

Industry-leading AI models trained with customer-specific edge-case data, collected through teleoperation and tele segmentation, to provide unmatched reliability

Mobile Base

With built-in connectivity and conveyor belt, robot autonomously navigates in and out of the container with push of a single button. Forklift or use intuitive remote control to navigate around the warehouse floor

Unloadable

Not Unloadable

Unloading Robot Specifications

Box dimensions between 8" & 30"

Box weight up to 80 lbs when top surface available

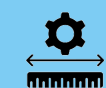

Unloading Speed:

- 300-350 cases/hr (on single pick)
- 600-650 cases/hr (on dual pick)

Site receives > 20 floor-loaded trailers/containers per month

12ft horizontal clearance from dock door; 400 sq ft of warehouse space for robot storage
